e-VET Trainers 4 Artificial Intelligence

Artificial Intelligence in VET

e-VET4AI | Newsletter N°3 | July 2023

LTTA in Frankfurt

From the 28th to the 30th of March 2023, educators joining from all over Europe had the chance to experience firsthand the outputs of the project and test its functionality and operativity through the LTTA (Learning Training and Teaching Activity), organized by the partnership of e-VET4AI. The 25 participants challenged their views and knowledge by attending fascinating meetings and seminars about A.I. implementation and state of the art, with particular attention to education.

The activities were hosted by the coordinator of the project ITKAM. The group visited FraportAG, Germany's most important Aviation HUB and VET body and also the Learning factory of the Centre for Industrial Productivity (CIP), an innovative training centre of Darmstadt University where tools and methods for designing production processes are taught. Last, during the third and final day of the LTTA, the group tested the contents, the E-VET4AI online Platform and App and the e-VET SAT, giving valuable feedback.

Right after that, on March 31st the partnership met in Frankfurt to discuss the following steps.

Co-funded by
the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

Our Self-Awareness Tool and Trainers Platform are finally available online!

Do AR, AI and IoT sound like complicated word riddles to you? If you want to learn something more about the technologies used in the industry, our Self-Awareness Tool (SAT) and Trainer's platform are there for you!

You can test yourself on these 5 topics:

Big Data

**Artificial
Intelligence**

**Machine
Learning**

**Digital
Twin**

**Augmented
Reality**

The Self-awareness tool (SAT):

With the [Self-awareness tool](#) you will be able to test your knowledge on these 5 topics and access a series examples of applications of these technologies

The Trainer's platform and app:

Once you are well warmed up after taking the SAT you can choose which topics you want to deepen through the project's [Trainer's platform](#), which is also accessible through an App. Each topic has a dedicated course. After going through the contents, you will be able to take a test and obtain a certificate of attendance.

[Here you can find more info on the tools.](#)

Coming Soon:

- From September 2023 the SAT and Trainer's platform and App will be available in Italian, French, Spanish, German and Greek
- Institutions and teachers interested in the project will be able to participate to national workshops in Italy, Germany and Spain
- e-VET4AI is still developing a training model with challenges and exercise to apply the teacher's newly acquired skills in class.

Save the date!

Our e-VET4AI final conference will take place in Milan on
November 23rd 2023!
